## **What's New in A-Train 9 V4.0 : Japan Rail Simulator**

The new version of A-Train has a stack of new features that focus on the two most important aspects of gameplay: realism and control.

### **Enhanced Realism**

A-Train is about creating working, profitable cities built around a strong transport network. Over the years we have seen our players create some fantastic cities, the scale and scope of which is staggering.

Whether it is the painstaking re-creation of 100 km<sup>2</sup> real-life cities, or imaginative sprawling utopias, A-Train has always allowed the player to use their imagination. The latest version increases the scale and scope of the game 100%. Twice as many vehicles can be placed on landscapes with twice as many art assets. More road and track-side features with new levels of flexibility in the way that road and rail are built.

The player can now use these tools to create more realistic and involved cities either from real-life or from their imagination. This extra realism is balanced by some great new control options which work at both the individual vehicle level and the management control level of the game.

### **Become the Driver**

Have you ever wondered what it might be like to actually drive one of your trains? To actually experience the challenges the engineers may face in keeping to the speed limit, providing a comfortable ride, and delivering the goods and passengers on time? Well, in A-Train 9 V4 Japan Rail Simulator, it's now possible to step on the footplate and take control. Either from the first-person engineers point of view, or from a bird's-eye 3rd person viewpoint, experience your cities like never before.

It's not just trains. Jump on board a car or boat and see your creations from whole new perspectives. Ever wondered what it would be like to be a citizen or a worker in your city? While now you can find out.

### **Double the Vehicles**

Doubling the number of vehicles in the game adds a massive amount of scope and scale to the game, and that brings with it its own challenges. It might be overwhelming to have 200 trains running simultaneously. Understanding what they are all doing and how to optimize their timetables and routes with so much going on would be a challenge for anyone.

### **Plan Your Routes**

A-Train 9 V4 Japan Rail Simulator adds new features that bring you control from the transport planner level.

It's now possible to sort and filter your vehicle by type and group them into color-coded teams. How you use these features is up to the player. You may want to group your trains by the routes they travel, or perhaps separate them into long distance and commuter trains. It might certainly be a good idea to colour code passenger and freight trains separately, but that choice is yours and with the filter and sort options it's very easy to set up.

The control is there, and the choices are yours. Experiment and develop your own system using the new tools provided, and then see at a glance how your network is operating.

### **Precise Layout Control**

The new version of A-Train offers more control than ever. Track laying has been improved, trains can now have their own

---

custom consist and speed settings, land can be raised and flattened within the game itself (at a cost).

It's your world, creating the perfect rail and road transport system has never been more satisfying.

### **Assets to Create Realistic Environments**

Hundreds of new art assets are included in the game. From roadside elements such as post boxes and bus stands right up to suspension bridges, landmarks airports. You can now create detailed and interesting worlds alive with detail.

### **Realistic or Model Scaling**

Massive areas of land to expand in to. View it all in 4K resolution (with a suitable monitor) and decide whether you want to use the new 1:1 scale modelling in the game which adds a new level of realism. Whether it's the big image or the fine details, A-Train 9 V4 Japan Rail Simulator has scale covered.

Whoever did this game should be sent to jail. This game is not just bad, terrible, a complete waste of time... it is physically painful. The developers should pay a fee for mental pain inflicted to the users... I really, really hope they will never and ever make another game, not in a million years... it is that bad.... Good end to the trilogy! Plus Victon is even more of an ♥♥♥♥♥♥♥♥ in this one so yay!. ALONE? hearkens back to those classic psychological horror games where you have to solve many a puzzle while dealing with consistent scares and sounds along the way. For a game that is only priced at \$2, it surprisingly offers tons of replayability and versatility, as the game features multiple endings based on the way you play the game. For that reason alone, ALONE? more than pays for itself. The graphical environment is very pretty for an indie game, the story is intriguing off of the bat, and the atmosphere is genuinely spooky, but I wouldn't go so far to say that this game will give you nightmares with the "jumpscare". Still, for the price of admission, it's definitely something to check out if you're a fan of this genre. Here's a link to my Let's Play of the beginning of the game, let me know what you think:

<https://www.youtube.com/watch?v=BXJp7ba7TfI>. Amazing story, visuals that hold up surprisingly well for a 2005 game, and arguably the most uniquely balanced and varied factions, each with clearly different playstyles and unit variety.

[In short, a U.S Army faction that is brutally strong and hits like a truck in the late game with specialized, heavily armored and destructive units, but lacking in versatility \(Abram tanks that can only fight ground units, Avenger ground-to-air, f-14 air-to-air, etc\). A TFT Direct Ops faction that sacrifices cheap numbers and specialization in favor of units that can handle multiple scenarios \(Heavy Snipers good for infantry and vehicles, Spinner tanks that can switch between railguns, air missiles, and remote bomb drones\) and Consortium that specializes in cheap, high damage, low movement/fire rate hit and run tactics \(Akula stealth tanks, BTR transports\)](#)

[In other words, if you ever enjoyed games like Red Alert, you find this game to be very enjoyable. Sadly, online is essentially dead, but for 3\\$ the campaign and bot matches alone are worth the price.. First annoyance, pixel hunting to find a section of the wall to get a rock.](#)

[Second annoyance, having to look at the bas-relief that has ZERO importance before hiding to progress the story.](#)

[Third annoyance, a sliding block puzzle.](#)

[There's a reason these kinds of puzzle games pretty much disappeared for years.... Everything's wrong in this game, it just ♥♥♥♥♥♥♥♥ing sucks.](#)

---

Pretty sure most people know what they're getting into by now with Spiderweb games.

This is a remake of a remake, a turn-based, party RPG with an open world, tons of quests, and a legitimately interesting world and story.

It's not going to change your life, but it will pass the time pleasantly to be sure.. Buy something else. Flatout ultimate carnage, burnout paradise, dirt 3. Or better yet, go preorder next car game from bugbear - but don't waste your money on this thing.. only cost .99 cents. What the actual...

. Works perfectly
